

Air pollution

is one of the UK's biggest killers

There are areas of High Wycombe that exceed air quality levels

Air pollution from exhaust fumes kills more than twice as many people as road accidents in Britain, experts claim. 'Daily Telegraph'

We need:

- A plan to end illegal air pollution in 2018
- A diesel scrappage scheme to help people shift to clean vehicles
- Changes to road tax to deter diesel use
- A comprehensive network of plug-in points for electric vehicles by 2025
- Huge investment in public transport, walking and cycling routes
- A new Clean Air Act for the whole country to curb all types of air pollution

Act now to stop another 40,000 lives being lost - every year.

Have Your Say - the government are consulting until
15th June on a revised national Air Quality Plan.
